

Sprint #3 Report

Game of Cards

Team WildCard

Revision #1, 11/18/2018

Team Members: Thuan Le (PO), Thanut (Art) Parkeenvincha , Kalyn Williams, Kyle Lee(SM)

Actions to stop doing: We should stop have unorganized branches. We have gotten better with organizing our branches however it is still something to consider. Lastly we should stop assuming everyone is aware of changes and notify teammates in slack.

Actions to start doing: As a team we should take a few moments out of the week to work on code reviews. There has been some code on the project that have not been reviewed.

Actions to keep doing: As a team we should continue to turn work in on time. We should also continue to communicate with each other about scheduling and thing we do not understand. It is important that we also continue to have well organized scrum meetings. We should continue pair program and meeting at **least** once a week to work collectively on the program. Lastly we should continue improving the code to ensure a great user experience.

Work completed:

- As a user, I want to play the classic game Blackjack.
- As a developer, I want to test *Chance* to ensure that there are no edge cases and the game runs smoothly.
- As a developer, I want to test the Deck to ensure that there are no edge cases and the game runs smoothly.

Work not completed:

- As a user, I want to experience *Chance* in a multiplayer setting with friends.
- As a user, I want to experience *BlackJack* in a multiplayer setting with friends.
- As a developer, I want to test *BlackJack* to ensure that there are no edge cases and the game runs smoothly.

Completion rate:

During the second sprint, 3 user stories were completed:

- As a user, I want to play the classic game Blackjack. (20)
- As a developer, I want to test *Chance* to ensure that there are no edge cases and the game runs smoothly.(5)
- As a developer, I want to test the Deck to ensure that there are no edge cases and the game runs smoothly.(10)
- As a user, I want to experience *Chance* in a multiplayer setting with friends.(15)

It is estimated that we will spend about 86 hours on this project if every point is equal to an hour of work. The second sprint took us about 50 hours.
