

Working Prototype Known Problems Report

Game of Cards

Team WildCard

Revision #3, 12/05/2018

Team Members: Thuan Le (PO), Thanut (Art) Parkeenvincha (S1 & S4 SM), Kalyn Williams (S2 SM), Kyle Lee (S3 SM)

1. Volume button in the options menu does not function currently.
2. We are unable to play multiplayer games of Chance or Blackjack. We are able to set up a connection between multiple players, but are not able to spawn player's hands or enable any interactions between them.
3. Resolutions other than 16:9 are not currently supported.
4. Our unit tests give us the following warning when compiling:
 - a. You are trying to create a MonoBehaviour using the 'new' keyword. This is not allowed. MonoBehaviours can only be added using AddComponent(). Alternatively, your script can inherit from ScriptableObject or no base class at all.
 - b. They are still functional though.
5. Certain unit tests fail because of our use of sounds in certain files.
 - a. We have not determined how to mock the sounds in the unit tests
 - b. Effort was put in to simulate adding sound files dynamically, but the tests still fail.
6. When starting from a scene other than the main menu, the music does not play.
7. If Chance or Blackjack starts and the back button is pressed immediately, the initial dealing sound continues to play in the main menus.
